JURUSAN SISTEM INFORMASI

UNIVERSITAS PESANTREN TINGGI DARUL 'ULUM JOMBANG

2024

1. Struktur Dasar

Output:

2. Macam-Macam Tag HTML

A. Tag Heading <h1/h2/h3..>

Output:

B. Tag Paragraf

C. Tag Break (
)

D. Tag untuk penebalan dan garis miring (dan)

E. Cara Membuat Daftar/List di HTML

```
### District Section New Co. S
```

F. Cara Membuat link di HTML <a>

G. Cara Menambahkan Gambar di HTML (tag image)

Atribut alt dalam tag

• Atribut width dan height dalam tag

H. Cara Membuat Tabel HTML dengan tag , dan

```
The late Section View is the format the Company of the Company of
```

I. Cara Membuat Form di HTML (tag form)

```
The last Selection News last Name Internal Help 6 - 2 Parameter | Displace |
```

3. Membuat Form

Analisa Code:

1. <!DOCTYPE html>

- **DOCTYPE**: <!DOCTYPE html> menandakan bahwa ini adalah dokumen HTML5, yang merupakan standar terbaru untuk HTML.
- **Tag <html>, <head>, dan <body>**: Struktur dasar dokumen HTML. Bagian <head> mengandung metadata dan judul, sementara konten halaman ada di dalam <body>.
- 2. <form action="formulir.html" method="get">
 - action="formulir.html": Saat formulir dikirim, data akan diarahkan ke halaman formulir.html.
 - method="get": Metode GET digunakan untuk mengirim data formulir melalui URL. Jika data bersifat sensitif (seperti kata sandi), sebaiknya gunakan metode POST.
- 3. Nama: <input type="text" name="Nama" value="Willy" />
 - <input type="text">: Elemen input teks untuk nama.
 - name="Nama": Atribut name digunakan untuk menentukan kunci yang akan digunakan ketika data dikirim.
 - value="Willy": Menetapkan nilai default "Willy" untuk kolom nama.
- **4.** Password: <input type="password" name="123456" />

• <input type="password">: Elemen input untuk memasukkan kata sandi. Data yang diketik akan disembunyikan.

5. Jenis Kelamin:

<input type="radio" name="jenis_kelamin" value="laki-laki" checked /> laki-laki <input type="radio" name="jenis_kelamin" value="perempuan" /> perempuan

- <input type="radio">: Input radio memungkinkan pengguna memilih satu opsi dari beberapa pilihan.
- name="jenis_kelamin": Karena kedua radio button berbagi atribut name, hanya satu yang bisa dipilih.
- checked: Menandai radio button "laki-laki" sebagai pilihan default.
- - <input type="checkbox">: Input checkbox memungkinkan pemilihan lebih dari satu opsi.
 - Setiap checkbox memiliki atribut name yang berbeda. Namun, penggunaan name="hobi_baca", name="hobi_nulis", dan name="hobi_mancing" akan mengirimkan satu nilai per checkbox yang dipilih. Lebih baik jika menggunakan array seperti name="hobi[]" agar bisa menyimpan beberapa pilihan sekaligus.
 - Checkbox "Menulis" memiliki atribut checked, jadi akan dipilih secara default.

7. Asal Kota:

- <select>: Digunakan untuk membuat daftar pilihan drop-down.
- name="asal_kota": Nilai kota yang dipilih akan dikirim dengan nama ini.
- <option>: Setiap opsi memiliki nilai yang berbeda, dan opsi "Semarang" disetel sebagai pilihan default (selected).

8. Komentar Anda:

- <textarea>: Elemen ini memungkinkan pengguna memasukkan teks dalam jumlah besar.
- name="komentar": Atribut name menentukan kunci untuk teks yang diinput oleh pengguna.
- rows="5" cols="20": Menentukan ukuran area teks.
- isi default area teks adalah "Senang bisa mempelajari bahasa Pemrogaman".
- 9. <input type="submit" value="Mulai Proses!" >
 - <input type="submit">: Tombol submit untuk mengirimkan data formulir.
 - value="Mulai Proses!": Label pada tombol.
